

File Management in C Programming

In this topic you will learn c programming file management,openinig a file and closing a file in c programming,the following example of file management in c programming.

Example

```
#include<stdio.h>
#include<conio.h>
main()
{
    FILE *fp;
    char ch;
    fp = fopen("demo.txt", "w");
    printf("Enter data");
    while( (ch = getchar()) != EOF) {
        putc(ch,fp);
    }
    fclose(fp);
    fp = fopen("demo.txt", "r");

    while( (ch = getc(fp) != EOF)
        printf("%c",ch);

    fclose(fp);
}
```
