

Increment Decrement Operators in C

C programming allows two very useful operators. these are the increment and decrement operators, we use the increment and decrement statements in for and while loop in c programming.

Sr.No	Operators	Descriptions
01	++	Increment
02	--	Decrement

Example

```
#include <stdio.h>
void main()
{
    int x = 10, y = 20;
    printf("Value of x : %d \n", x);
    printf("Value of x : %d \n", x++);
    printf("Value of x : %d \n", x);

    printf("Value of y : %d \n", y);
    printf("Value of y : %d \n", y--);
    printf("Value of y : %d \n", y);
}
```
