

# HTML - Headings

Headings are used to specify the headings of sections or sub-section in a document depending on the desired size of the text, any of six available levels `<h1>` to `<h6>` of heading can be used. `<h1>` defines the largest heading while `<h6>` defines the smallest. HTML automatically adds an extra blank line before and after a heading tags are paired tag so that it is necessary to and these tags with forward slash / sign.

## Example

```
<h1>This is a Heading</h1>
<h2>This is a Heading</h2>
<h3>This is a Heading</h3>
<h4>This is a Heading</h4>
<h5>This is a Heading</h5>
<h6>This is a Heading</h6>
```

## Output on Web Browser

# This is a Heading

## This is a Heading

### This is a Heading

#### This is a Heading

##### This is a Heading

###### This is a Heading
