

# PHP - Foreach Loop

The foreach construct provides an easy way to iterate over arrays. foreach works only on arrays and objects.

## Syntax

```
<?php
    foreach (array_variable as value)
    {
        code to be execute]
    }
?>
```

## Example

```
<?php

$x=array("Tutorials","Computer","Online Tools");
foreach($x as $value)
{
    echo $value."<br>";
}

?>
```

## Output

```
Tutorials
Computer
Online Tools
```
