

PHP - Multidimensional Array

A multidimensional array, each element in the main array can also be an array, and each element in the sub-array can be an array, and so on. In this example we create a multidimensional array, with automatically assigned ID keys.

Example

```
<?php
$products=array
(
    "Lenovo"=>array("Leptop", "Mobile Phones"),
    "Microsoft"=>array("Leptop", "Mobile Phones"),
    "Dell"=>array("Leptop", "Server")
);
?>
```
