# Python Comments

Python is similar as c programming language python support two type of comments the following description and it's example.

## Single Line Comments

In case user wants to specify a single line comment,then comment must start with #

```
# This is Single Line Comment.
```

---

## Multi Line Comment

Multi line comment can be given inside (''') triple quotes.

```
''' This
        is
        Multi Line Comment.'''
```
