Python Continue Statements

The Continue statements is used to skip the rest code inside a loop the current iteration only.loop does not terminate but continues on with the next iteration,the following example of continue.

Example

```
for val in "bharat":
        if val == "r":
                continue
                print(val);
```

Output

```
b
h
a
a
t
```
